HB-19	4300	14-23	External	5 lb 15 oz	D

### More Information

Backpack HB-19 is a 4300 cubic inch external frame similar to picture (newer model). It was likely purchased in the early 1990's, and the current price for an equivalent pack would be \$180-200. This pack is good for a long weekend on the trail with plenty of space in the main compartment. Note: the lower access zipper has split across the teeth (probably snagged hard on something), thus this pocket has been sewn closed by Garry Luttrell. The entire main compartment is available from the top.

Get the pack a day early so that you can work with the quite flexible suspension and get the straps adjusted right. This sturdy pack appears to be a workhorse over the years for the club, so give it a try.
