## More Information

A new backpacking tent to replace a nearly 20-year-old 3-person tent. With a \$40 discount and the footprint, the total was \$267. The Stormbreak 3 has a 40 sq ft floorplan and is also equipped with two entrances and two 10 sq ft vestibules. With a 46" peak, one would not be able to stand up, but its floor area is big enough for three adults - or a six-person card game on a rainy day.

The club once again purchased the footprint (\$45) to ensure longer life with good fitting floor protection. The total packaged weight (including bag and footprint) is listed as 6 pounds, 10 ounces. The tent has a reasonable set-up time.

For cold camping, or camping in general, ventilation is your friend against condensation. Ensure your fly is properly staked down to allow as much air between the fly and the base of the tent.
